

Eligibility List 2016

The Global Fund adopted an allocation-based approach in 2013 to invest more strategically to accelerate the end of HIV/AIDS, TB and malaria as epidemics. Under the Eligibility and Counterpart Financing Policy¹ eligibility criteria are established to identify which country components may be eligible to receive an allocation, noting that eligibility does not guarantee an allocation.

While Global Fund eligibility determinations will be made annually and effective from 1 January to 31 December, allocations are made once every three years. Prior to the 2014 allocation, an eligibility list was published to reflect the country components that were eligible to apply for funding over the 2014-2016 allocation period. The list set forth below reflects the eligibility determination for the year 2016. If a country has no eligible components, it does not appear on the list.

Eligibility is determined by a country's income level and official disease burden data. A country's income level for 2016 is based on income classifications published by the World Bank in July 2015, in accordance with the GNI per capita thresholds for each income classification, and takes into consideration updated GNI per capita data from the World Bank in December 2015. Similarly, a country's disease burden is based on the latest available data provided by WHO and UNAIDS in December 2015.

Please note that this list is strictly for information purposes and is not the list that will be used to determine allocations for the period 2017-2019. A new eligibility list for 2017 taking into account updated GNI per capita data published by the World Bank in 2016 and disease burden information will be published for the next allocation. Please refer to the notes that follow the list for additional information.

Please direct questions about the list to: accesstofunding@theglobalfund.org

Notes to changes in eligibility status

^a Botswana malaria component moved to transition as Botswana is an Upper-Middle Income country and Botswana's malaria disease burden category changed from 'High' in 2015 Eligibility List to 'Moderate' in 2016 Eligibility List.

^b Since Bulgaria is not on OECD DAC list of ODA recipients, Bulgaria HIV/AIDS program is eligible for funding under the NGO rule (see Notes) provided they meet NGO rule criteria detailed in paragraph 12 of the Eligibility and Counterpart Financing Policy.

^c Bulgaria TB component moved to transition as Bulgaria is an Upper-Middle Income country and Bulgaria's TB disease burden category changed from 'High' in 2015 Eligibility List to 'Moderate' in 2016 Eligibility List.

^d Equatorial Guinea's GNIpc, 2014 (Atlas method) as updated by World Bank on 29 December 2015 is US\$ 10,210 which changes their income categorization from High Income to Upper-Middle Income. There are no active Global Fund grants in Equatorial Guinea. Components that become eligible during an allocation period may receive an allocation, subject to availability of funding, only after being newly eligible for 2 consecutive years. Equatorial Guinea was not eligible in 2015 Eligibility List and was not eligible for an allocation in 2014.

^e Kazakhstan's HIV disease burden categorization changed from 'Moderate' in 2015 Eligibility List to 'High' in 2016 Eligibility List. Components that become eligible during an allocation period may receive an allocation, subject to availability of funding, only after being newly eligible for 2 consecutive years. Kazakhstan HIV/AIDS was not eligible in 2015 Eligibility List and was not eligible for an allocation in 2014.

^f Lebanon's HIV disease burden categorization changed from 'Low' in 2015 Eligibility List to 'High' in 2016 Eligibility List. Components that become eligible during an allocation period may receive an allocation, subject to availability of funding, only after being newly eligible for 2 consecutive years. Lebanon HIV/AIDS was not eligible in 2015 Eligibility List and was not eligible for an allocation in 2014.

^g Montenegro's HIV disease burden categorization changed from 'Moderate' in 2015 Eligibility List to 'High' in 2016 Eligibility List. Components that become eligible during an allocation period may receive an allocation, subject to availability of funding, only after being newly eligible for 2 consecutive years. Montenegro HIV/AIDS was not eligible in 2015 Eligibility List and was not eligible for an allocation in 2014.

^h Palau's TB disease burden categorization changed from 'Moderate' in 2015 Eligibility List to 'High' in 2016 Eligibility List. Components that become eligible during an allocation period may receive an allocation, subject to availability of funding, only after being newly eligible for 2 consecutive years. Palau TB was not eligible in 2015 Eligibility List and was not eligible for an allocation in 2014.

ⁱ Paraguay TB component moved to transition as Paraguay moved to Upper-Middle Income categorization as per GNIpc, 2014 (Atlas method) data published by World Bank on 29th December 2015 and has a 'Moderate' disease burden.

^j Paraguay malaria component moved to transition as Paraguay moved to Upper-Middle Income categorization as per GNIpc, 2014 (Atlas method) data published by World Bank on 29th December 2015 and has a 'Moderate' disease burden.

^k Since Romania is not on OECD DAC list of ODA recipients, Romania HIV/AIDS program is eligible for funding under the NGO rule (see Notes) provided they meet NGO rule criteria detailed in paragraph 12 of the Eligibility and Counterpart Financing Policy.

^l Russian Federation HIV/AIDS program is receiving funding under the grace period (paragraph 14 of the Eligibility and Counterpart Financing Policy) provided for the NGO Rule (see Notes).

^m Turkmenistan TB component moved to transition as Turkmenistan's TB disease burden category changed from 'High' to 'Moderate'.

Notes

Income category: The Global Fund income categories are based on the World Bank (Atlas Method) Income Classifications: Low Income Countries (LI); Lower-Middle Income Countries (LMI); and Upper-Middle Income Countries (UMI). The GNI-per-capita thresholds which determine income classifications were published by the World Bank in July 2015 and these, together with the updated GNI per capita data published in December 2015, were used for the 2016 Eligibility List. The Global Fund classification further divides LMI countries into two groups, namely Lower-LMI countries and Upper-LMI countries based on the midpoint of the GNI per capita range of the World Bank's LMI category.

Disease burden: Disease burden data are provided to the Global Fund Secretariat by WHO and UNAIDS. The disease burden criterion applies to UMI countries in order to determine their eligibility, with the exception of the 'malaria-free' criterion (below) which applies to all countries regardless of income level:

- Members of the Group of 20 countries (G-20 members) that are UMI with less than an extreme disease burden are not eligible, unless they meet the criteria to apply under the 'NGO Rule.'
- UMI countries with 'Moderate' or 'Low' disease burden are not eligible for funding. UMIs that are designated under the 'small island economy exception' to the International Development Association lending requirements are eligible for funding regardless of national disease burden.
- For HIV: UMI countries must be listed on the OECD's DAC list of ODA recipients² to be eligible for funding, unless they meet the criteria to apply under the 'NGO Rule.'
- For malaria:
 - The Global Fund uses malaria data from earlier years (2000), as recommended by WHO. Each year, WHO provides revised 2000 estimates, which has changed the disease burden score for some countries; and
 - Countries that are certified as 'malaria-free' by WHO or are on the WHO's 'Supplementary List' of countries where malaria never existed or disappeared, are not eligible to apply for malaria funding and will not be eligible for an allocation for malaria, regardless of their income level.

NGO rule: For HIV/AIDS only, UMIs not listed on the OECD-DAC list of ODA recipients will only be able to receive an allocation if they meet all the conditions as described in the Eligibility and Counterpart Financing Policy, in particular the confirmation that the services requested in the application are not being provided due to political barriers. In all cases, such applications must be submitted by an NGO and must comply with all of the conditions.

Grace period: Countries with an existing HIV grant under the NGO rule that become ineligible due to changes in income level are provided with a grace period of one allocation period; such countries must continue to meet the conditions of the NGO rule.

Transition funding: Components funded under an existing grant that become ineligible may receive funding for up to one additional allocation period immediately following their change in eligibility. The Secretariat, based on country context and existing portfolio considerations, will determine the appropriate period and amount of funding.

- Transition^(year): Components that moved to transition during this allocation period and may receive funding during the next allocation period. (*Year*) represents the year in which the component moved into 'Transition' category.
- Transition^(current): Components receiving transition funding during this allocation period and currently are not eligible for an allocation.

² The Development Assistance Committee (DAC) of the Organisation for Economic Co-operation and Development (OECD) publishes a [list of countries eligible](#) for Official Development Assistance (ODA). a
