

Long-Term Support to Key and Vulnerable Population Groups and Networks

Contact Details

Eleven partners work to strengthen the long-term capacity of key and vulnerable population groups and networks to support meaningful engagement of their constituencies in Global Fund and related processes. Partners have three strategic objectives:

1. To amplify the participation and voice of key and vulnerable population communities in policy and decision-making fora and in governance and stewardship of responses to the three diseases
2. To strengthen the influence of populations most vulnerable to and affected by HIV/TB/malaria on the design and implementation of national strategies and costed plans, so that they adequately reflect and respond to realities and needs associated with human rights, gender, community responses and community systems strengthening
3. To empower populations most vulnerable to and affected by HIV/TB/malaria to generate and use data to monitor program coverage and quality and national commitments to end the three epidemics and to utilize the evidence generated for advocacy and programmatic action

The Community, Rights and Gender Strategic Initiative (CRG SI) furthermore supports the HER Voice Fund to strengthen the engagement of adolescent girls and young women in Global Fund and related processes.
