Harm Reduction—New elements grant cycle 7

Harm reduction now an HIV “program essential” Top priority interventions: needle/syringe programming, opioid substitution therapy and naloxone for overdose. All countries must describe status, and high impact/Core countries expected to plan for full implementation

People who use drugs—In modular framework for planning/budgeting, no longer just “PWID” but “people who use/inject drugs and their sexual partners.” New scope for stimulant/chemsex/new psychoactive substance work.

Clarity on hepatitis B and C. Treatment supported for people who inject drugs *regardless of HIV status* if strong epidemiological case and part of comprehensive HIV programming

Emphasis on community-led monitoring, key role for people who inject drugs in planning, delivery and evaluation of services and policy change

Human rights program essentials—integrating human rights protections into HIV/TB services; removing stigma in health care; access to justice; and policy advocacy, including community led

Technical brief on **Harm Reduction for People Who Use Drugs: Priorities for Investment and Increased Impact in HIV Programming** ([English](#) here, Russian, Spanish, French and Portuguese forthcoming)

“New” psychoactive substances

Mepher, Sabaka, Black Mamba, Dosia, Daska, Kedy, Krasofki, Skorost, Ligalka, Liga, Ximlo, Alpha PVP, Muka, Meow, Meph, Watermelon, Red Dragon, Ruby, Green, Black, White, Yellow

- Users have to be the experts
- Dose-response and emergency protocol (Serbia, Georgia)
- Frequency of injection and change in needle and syringe programming
- Sexual risk and mental health
- Policies leading to increased use and harms (urine testing, police coming when

Harm Reduction J 2020; 17: 94.

. New psychoactive substances in Eurasia: a qualitative study of people who use drugs and harm reduction services in six countries
[Eliza Kurcevič](#)¹ and [Rick Lines](#)

“New” outreach methods

- Harm reduction advice on dark/deep net platforms (Hydra, Empire Market, etc). Doctor X (Silk Road and Silk Road 2)
- Viber, Telegram. Group chat for general information, direct message for more personal
 - Schedule of mobile units
 - Wound care information
- Overdose bot
- Drug checking (reagent testing, portable machinery)

“Online to offline”

Добро пожаловать на сайт TestMeNow! Вы тратите всего 2 минуты своего времени, вы можете легко записаться на прием, чтобы проверить. Вы можете быть уверены, что ваша информация будет конфиденциальной. Пожалуйста, следуйте инструкциям ниже 😊

записаться на прием в клинику

1. КЛИНИКА

2. ДАТА

3. ИНФОРМАЦИЯ

4. ГОТОВО

Шаг 1

Выберите провинцию и клинику.
